

EE/DER Engagement Platform

UtilityAPI product sheet for
Utilities, CCAs, and Utility Vendors

OVERVIEW

The energy landscape is changing. More and more technologies are being deployed behind the meter. UtilityAPI is your pathway to understanding and engaging the distributed energy resources (DER) and energy efficiency (EE) companies. Our platform offers both data access to third parties and APIs for reporting performance information from third parties back into the utility or grid ecosystem.

Data Access Platform

Drop-in platform that can be used by third parties to request and download customer data.

Green Button Connect

We offer the only full-featured GBCMD tested and certified by UL and the Green Button Alliance.

Performance Reporting

Allow third parties to automatically submit performance data to meet reporting requirements.

Technical Support

Third party registration, onboarding, training, documentation, and technical support is included.

EE/DER Insights

Get visibility beyond the grid edge with insights on third party usage and performance reporting.

Easy Integration

Our platform can be easily embedded into most existing utility Meter Data Management (MDM) systems or utility vendor platforms.

Safe, Secure, and Private

Data exchange is consent-driven, 100% encrypted, standards compliant, and auditable.

Flexible Licensing

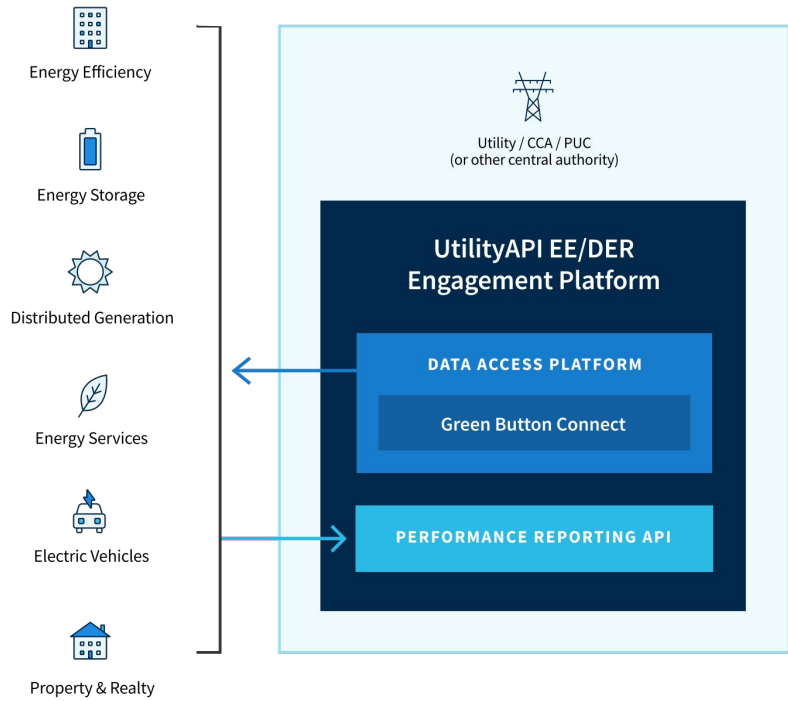

Licensing is available directly to utilities, CCAs, and utility vendors for partnering or subcontracting.

OUR PRODUCTS

We offer a variety of products to provide value to utilities and utility vendors.

- EE/DER Engagement Platform
- Data Access Platform
- Green Button Connect
- Performance Reporting API
- Data Access Advising

OUR PLATFORM

OUR ECOSYSTEM

Existing third-party customers range from large enterprise companies to small and medium businesses. We support national and local distributed energy and energy efficiency companies alike.

- Tesla
- GE
- Lockheed Martin
- Stem
- Sunrun
- EDF Renewables
- REC Solar
- Engie Insights
- Grid Alternatives
