UTILITYAPI

Green Button Connect

For Utilities, CCAs, and Utility Vendors

OVERVIEW

UtilityAPI offers a peerless Green Button Connect implementation. Built on our Data Access Platform, we offer standardized, Green Button Alliance certified, UL-tested, low-cost Green Button Connect My Data (GBCMD) and Green Button Download My Data (GBDMD) solutions. Our proven, mature solutions are the *only* GBA-certified, full-featured data exchange platforms in the United States.

What is Green Button Connect?
Green Button Connect My Data is an international standard for providing third party data access to utility customer data, such as account, billing, and interval usage data.

Safe, Secure, and Private
Data exchange is consent-driven, 100% encrypted, standards-compliant (NAESB ESPI 3.3) and fully auditable.

Technical Support
Third party registration, onboarding, training, documentation, and technical support is included.

EE/DER Insights
Get visibility beyond the grid edge with insights on third party usage and performance reporting.

Easy Integration
Our platform can be easily embedded into most existing utility Meter Data Management (MDM) systems or utility vendor platforms.

Small Business Friendly
Our software can be easily used by small local vendors with few technical resources.
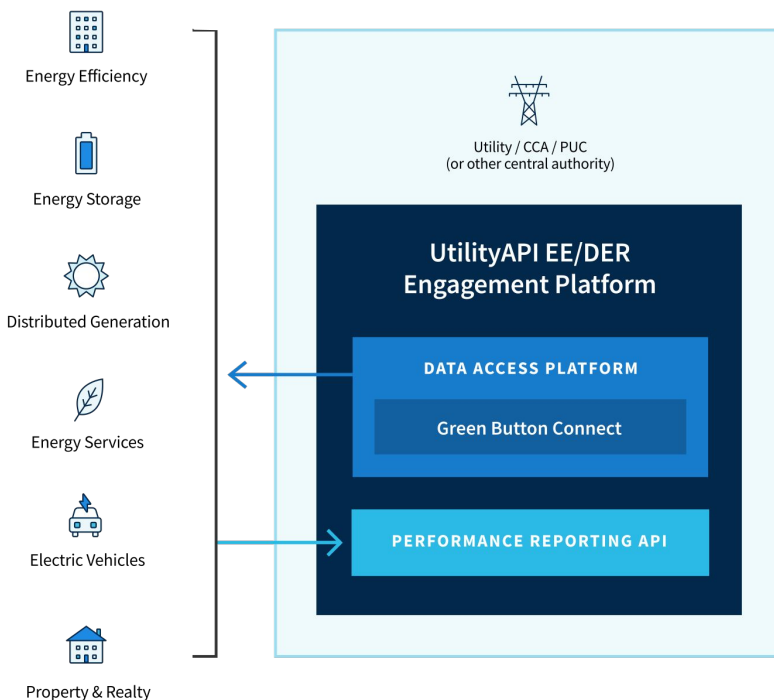

Flexible Licensing
Licensing is available directly to utilities, CCAs, and utility vendors for partnering or subcontracting.
