

Green Button Hosting

UtilityAPI Product Sheet

OVERVIEW

UtilityAPI offers hosting for third parties wanting to integrate with utility Green Button Connect My Data systems (sometimes called Share My Data). We manage and host your connection to the utility, so data shared with you shows up on your dashboard and API the same as other data.

High-volume interval data

Green Button Connect is a low-cost, low-overhead, fast way to get lots of meter interval data.

Become listed third party

You will show up in the third party list on the supported utility's website.

Managed setup and hosting

- 1) We help guide you through registration.
- 2) You list UtilityAPI as your technical contact.
- 3) We will handle the rest of the setup.
- 4) Once setup, use UtilityAPI as normal.

NOTE: Some utility Green Button Connect offerings may have limited functionality or limited datasets (e.g. intervals only, no bills, 1-5 day delay, etc.).

Nationwide support

We support all implementations of Green Button Connect offered by utilities across the United States, both residential and commercial.

No technical resources required

We handle all of technical integration and connectivity setup requirements with the utility.

Technical support

We literally help write the spec for Green Button, so we are experts in managing these connections.

Continued compatibility

We will automatically update your connection with any changes or upgrades released by the utility.

OUR PRODUCTS

We offer a variety of products to provide value to our diverse customer base.

- Self-service Dashboard
- Automated API
- Ongoing Monitoring
- Standards Compliant Data Access Platform for Utilities

HOW GREEN BUTTON HOSTING IT WORKS

Register as third party with utility.

We will help guide you through registration.

List UtilityAPI as your technical contact.
