# UTILITYAPI

Utility Data Made Easy

UtilityAPI Product Sheet

OVERVIEW

UtilityAPI offers a simple, fast solution for requesting and downloading utility customer bill and interval data. Our service has been used by thousands of distributed energy resource (DER), energy efficiency (EE), building energy management (BEM), and property management (PM) companies.

Fast service
Data collection usually only takes a few minutes.

Residential and Commercial
We support all types of utility customers in utility territories we cover, including residential, commercial, industrial, agricultural, and more.

Easy process
1) Send data request to customer
2) Get meter list
3) Choose meters for data collection

Electric, gas, and water
We support collecting data for electric, gas, and water services in the utility territories we cover.

Aligned pricing
Pay for only the meters you choose to collect data for. If we can't get data, it's free.

Customizable
Customize data requests with your company logo and contact information.

No setup required
Can start using dashboard today. No technical expertise or software integration required.

API for developers
We have a fully documented API you can integrate into your existing software, both for internal software tools and consumer facing platforms.

OUR PRODUCTS
