

# UNLOCKING UTILITY DATA *FOR ALL.*

## UTILITY DATA EXCHANGE (UDX)

UtilityAPI's UDX enables utilities to comply with Green Button Connect My Data, streamline customer program implementation, and aggregate commercial customer meter data.

### GREEN BUTTON CONNECT

UDX is the world's only off-the-shelf Green Button Alliance (GBA)-certified data exchange platform for achieving Green Button Connect compliance. UDX's standard features include:

- A white-labeled user experience for customers and third parties;
- A third-party dashboard for requesting customer authorization;
- An administrative backend for reviewing third-party activities, exporting custom reports, and providing program vendors access.

### PROGRAM IMPLEMENTATION

Improve your customer program implementation by leveraging UDX's admin and user features:

- **Simplify contract negotiations.** Eliminate data access contracts by providing vendors with unique admin privileges based on program goals.
- **Streamline Program Enrollment.** Enhance rebate program enrollment and participation with UDX APIs.
- **Unlock Federal Program Funding.** Enable customer participation in IRA electrification programs, VPPs, and real-time rates.
